Таблица 2

мм

The table content is almost entirely obscured by heavy black redaction bars. Only faint outlines of text and some numbers are visible through the gaps. The structure appears to be a standard data table with multiple rows and columns, but the specific data points are illegible.

The table consists of approximately 12 rows and 2 columns. The first row contains some faint text. The second row has a large blacked-out section on the left and some text on the right. The third row contains a single character, possibly a Greek letter epsilon (ε), in the left column. The fourth row has a large blacked-out section on the left. The fifth row contains some text in both columns. The sixth row has a large blacked-out section on the left. The seventh row contains some text in both columns. The eighth row has a large blacked-out section on the left. The ninth row contains some text in both columns. The tenth row has a large blacked-out section on the left. The eleventh row contains some text in both columns. The twelfth row has a large blacked-out section on the left.
